

Yes, it's that time of year again!

Dear Fourth Grader,

Welcome to the wonderful world of fourth grade! It gives us pleasure to have you in our classes.

You should be looking forward to a year filled with challenges and opportunities to learn new things. In fact this year you will learn about the great state of New Jersey. Learning about the history, government, people, and geography of our state will better prepare you to express your views and opinions. You will also explore science through experiments and other hands on activities. In this way you will observe your new knowledge in action. You will be building onto your math foundation with new concepts while also developing your problem solving strategies. Your writing and communication skills will grow in leaps and bounds this year through our reading and language arts programs. We hope you will enjoy all the learning that awaits you in fourth grade!

So that you will be prepared for your first day of learning in fourth grade, please see the back of this sheet for a list of supplies that the fourth grade teachers would like you to have.

We hope that you thoroughly enjoy your summer vacation and you come back ready and eager to take part in the many wonderful things waiting for you in fourth grade!

Sincerely,

The Fourth Grade Teachers
